

CODING DOJO

AGENDA

1. Introduction to the Exercise
2. Coding
3. Summary / Exchange / Learnings

KATA: TRIP SERVICE

```
1 def get_trips_by_user(user):
2     trip_list = []
3     logged_user = UserSession.get_logged_user()
4     is_friend = False
5     if logged_user is not None:
6         for friend in user.get_friends():
7             if friend == logged_user:
8                 is_friend = True
9                 break
10        if is_friend:
11            trip_list = TripDAO.find_trips_by_user(user)
12        return trip_list
13    else:
14        raise UserNotLoggedInException()
```
